

# MOLLETI GIRIJA RANI

B.Tech – Computer Science & Engineering | Gandhi Institute of Technology and Management (GITAM)

molletigirijarani@gmail.com | +91-7799363778 | [linkedin.com/in/girija-rani-molleti-9329b1338](https://www.linkedin.com/in/girija-rani-molleti-9329b1338)

## RESEARCH OBJECTIVE

Motivated 2nd-year B.Tech Computer Science student at GITAM, passionate about building real-world applications and solving complex problems. Seeking internship opportunities to apply and expand skills in software development, web technologies, and data structures. Eager to contribute to innovative projects, collaborate with experienced teams, and grow as a computer science professional.

## EDUCATION

**Gandhi Institute of Technology and Management (GITAM)** 2025 – 2028

B.Tech in Computer Science & Engineering (Core) CGPA: 9.0 / 10

- Relevant Coursework: Data Structures, DBMS, Object-Oriented Programming, Web Technologies, C/C++, Java

**Aditya Polytechnic College** 2022 – 2025

Diploma – Computer Science & Engineering | SBTET Board Percentage: 97.48%

**Sri Nagaraja Municipal High School** Graduated 2022

Secondary School Certificate (SSC) | Board: SSC 538/600 | Percentage: 89.6%

## TECHNICAL SKILLS

**Programming Languages:** C, C++, Java, Python

**Web Technologies:** HTML, CSS, JavaScript (Web Development)

**Database:** DBMS, SQL, Database Management

**Data Structures:** Arrays, Linked Lists, Stacks, Queues, Trees

**Design Tools:** Figma

**IDEs & Tools:** IntelliJ IDEA, VS Code, Lovable (AI web builder)

## PROJECTS

**Women Safety & Empowerment Platform (Mentor–Mentee Integration)** 2025

Technologies: Figma, Lovable (AI Web Builder)

- Designed and developed a digital platform connecting women students with mentors for academic guidance, career development, and personal growth.
- Enables mentees to discover mentors based on expertise and request personalized mentorship support.
- Built with a privacy-focused environment to encourage open interaction; aims to empower women through knowledge sharing and community building.

**Sign Language Recognition System** 2025

Technologies: Python, OpenCV, Machine Learning, Computer Vision

- Developed a system that recognizes hand gestures and converts sign language into readable text using computer vision techniques.
- Implemented OpenCV and machine learning algorithms to detect and classify different hand signs in real time.
- Designed a user-friendly interface that helps bridge communication between hearing-impaired individuals & others.

### Real-Time Location Tracker

2024

*Technologies: Web Technologies, GPS APIs*

- Developed a real-time tracking application to monitor live user location using GPS.
- Displays continuous location coordinate updates; useful for personal safety and monitoring applications.

### Smart Study Planner

2024

*Technologies: Java, IntelliJ IDEA*

- Built a smart study planning system to help students manage schedules efficiently.
- Includes task prioritization, reminders, and progress tracking to improve productivity and time management.

### Quiz Application

2024

*Technologies: C, Data Structures*

- Developed an interactive quiz application supporting multiple-choice questions, automated scoring, and instant result display.
- Implemented using arrays and structures for efficient data management.

### Laser Security Alarm System

2024

*Technologies: Hardware (Electronics Components)*

- Built a laser-based security alarm system triggered by motion detection using body heat sensors.
- System activates alarm when a person interrupts the laser beam, simulating a real-world home security setup.

## ACHIEVEMENTS & COMPETITIONS

---

- Secured 71st Rank in ECET Examination — awarded merit-based scholarship at GITAM University.
- Participated in Smart India Hackathon (SIH) 2025 — internal round at GITAM, worked on real-world problem statements.
- Participated in CodeHer Hackathon 2025 — women-focused coding competition promoting tech innovation.

## RESEARCH INTERESTS

---

Web Technologies & Full-Stack Development | Data Structures & Algorithms | Database Systems | Women in Technology | Software Engineering

## EXPERIENCE

---

Full Stack Intern — Technical hub at Aditya university Nov 2024– May 2025 — Kakinada, India Learned and applied React.js,nodejs,Bootstrap and REST APIs while working on a Online Healthcare Monitoring and Reporting Platform.
